# RFoG Mounting System

Limit RFoG access within an enclosure

The Primex Verge RFoG (ONU) Mounting System is a compact, secure solution for protecting the RFoG component within a Primex enclosure.

Designed to fit industry-standard RFoG's, the snap lid and screws safely limit access to fiber and coax connections while storing fiber splices and slack.

125-1413: RFoG (ONU) Mounting System, white ABS

125-1475: RFoG (ONU) Mounting System, grey PC

## STEP 1

### Mounting system placement

Ensure lid freely opens and secure to MDE with screws provided.

## STEP 2

### Thread fiber around the tray

Can store up to 3ft of 2 or 3mm fiber outside or 3ft of 0.125 or 0.900mm fiber inside.

## STEP 3

### Install RFoG unit

Compatible with Commscope, Aurora and Arris RFoG platforms.

## STEP 4

### Connect cabling

Attach fiber and coax.

## STEP 5

### Close lid

Be sure to route fiber through the top to avoid pinching.

## STEP 6

### Secure RFoG mounting system

Use screws provided to secure lid and reduce access.
